

## Press Release

### Exceptional Entrepreneurship

#### **CINOGY GmbH named Finalist of the “Entrepreneur Of The Year” Programme 2016**

Passion, innovation and customer intimacy, this is what the finalists at the “Entrepreneur Of The Year 2016” programme have in common. For the 20th time the global business services and consultancy company EY (formally known as Ernst & Young) has been awarding the best entrepreneurs in Germany. CINOGY GmbH from Duderstadt is amongst the 35 finalists, who all have been appointed following a multi-step and thorough selection process.

Originating from the laboratories for laser and plasma technology of the University for practised Science & Art, CINOGY was founded in 2006 with the support of Prof. Hans Georg Naeder, Owner & CEO of the Ottobock Healthcare Group. CINOGY is specialising in the development and production of innovative and plasma based products and therapies for medical and cosmetic use.

“In 2015 we already received the prestigious Fraunhofer Award Technology for Humans for our Plasmaderm product”, says Dr. Dirk Wandke, CEO of CINOGY. “Being a finalist in the “Entrepreneur Award Of The Year 2016” programme is another huge success for our work and our team.”

#### **What is the Entrepreneur Of The Year Programme?**

The “Entrepreneur Of The Year” programme was created by EY to recognise the accomplishments of entrepreneurs around the globe. It builds on EY's more than 29 years of success in running “Entrepreneur Of The Year” programmes in more than 60 countries around the world. Each year, the “Entrepreneur Of The Year” country winners join together in Monaco to be inducted into the “World Entrepreneur Of The Year” Hall of Fame and vie for the EY World Entrepreneur Of The Year title.
